

JPC Aviation

Patria Netherlands is distributor of signaling and lighting products of JPC Aviation.

Helicopters

For helicopters there is a specialization in xenon and LED flash systems, JPC Aviation develops landing and taxi lights as well as interior lighting.

Jet airplane

Since 1981, JPC Aviation has developed for the main aircraft manufacturers technical solutions for aircraft and people security. In operation in more than 130 countries, JPC Aviation navigation and anticollision lights give the crew the best visibility whatever the outside conditions for their security.

General Aviation

With its expertise in commercial aviation JPC aviation is expanding its product range to include general aviation. JPC aviation offers European standard

products (ETSO) and minor modifications to simply replace your old lights with the latest technology available on the market.

Defense and Security

The flashlight technology is also used in other defense systems as in the shooting simulator with the use of JPC AVIATION flashlights bi mode for the confirmation of impact on the target. We also produce infrared lights for discrete markup in hostile terrain.
