

Orolia

Patria Netherlands is distributor of Emergency Locator Transmitters (ELTs) of Orolia.

The Kannad Integra ELT offers the highest level of resiliency through an innovative backup antenna design. Operating independently of the aircraft, the back-up antenna will transmit your position through the 406MHz frequency to the Cospas-Sarsat search and rescue satellites. This version is the Extended Range (ER) of the AF INTEGRA which operates from -40°C to +55°C.

The Integra Family is composed of AF (Automatic Fixed) and AP (Automatic Portable) ELTs.

AF ELT intended to be permanently attached to the aircraft and connected to an external antenna. AP ELT intended to be rigidly attached to the aircraft before the crash and connected to an external antenna but readily removable from the aircraft after a crash to be used as survival ELT.

We offer ELT solutions for all civil and military aircraft types & operators. You can also submit your ELT for repair services.

Please contact us at parts.nl@patriagroup.com for a quotation or get information about the complete Orolia product range. Our Customer Support Office will get in touch with you.
